

## DON'T LET THIS HAPPEN TO YOUR HOME

Homeowners report 2,900 home clothes dryer fires each year, according to U.S. government statistics. These fires result in deaths, injuries and an estimated \$35 million in property loss. Failure to clean your dryer vent from the lint

trap all the way outside is the leading cause of these fires. All it takes is one spark from a gas burning or electric dryer to set the highly combustible fibers alight.

Get your dryer vent inspected with us now!

# Indoor air quality directly affects the health, comfort, productivity and quality of life of anyone who breathes indoor air.

Your beautiful “clean” home could be a major source of airborne contaminants that could

prevent you and your family from feeling “healthy” and “energetic.” Allergic particles such as pollen, dust, mold spores, fungi spores, tobacco smoke, dust mite feces, pet

**According to the EPA, indoor air can be from two to five times more polluted than outdoor air, AND people spend 90 percent of their time indoors.**

hair and pet dander all contribute to poor indoor air quality.

A half teaspoon of dust contains as many as 1,000 dust mites and 250,000 allergenic dust mite fecal pellets. But don't worry, at Home Comfort Experts, we can eliminate ALL of it and keep your system running clean and efficiently. Give us a call and get your ducts cleaned to eliminate allergens, mold, dust

and other particles than can affect your family's breathing.

## INDOOR AIR QUALITY PRODUCTS

Today's indoor air quality products are capable of killing 99% of harmful viruses and infectious agents such as bacteria and flu viruses that pass through your home's HVAC system.

## BENEFITS OF IAQ PRODUCTS INSTALLED IN YOUR HOME:

- Fewer headaches.
- Fewer seasonal allergies and fatigue.
- Less household dust.
